

Accessories For Cable Glands

Brass Reducers and Adaptors

SWA brass adaptors and reducers provide an effective method of connection between dissimilar threads or sizes. Reducers reduce the thread entry diameter of an enclosure to accept a gland or fitting with a smaller or alternative thread.

It should be noted that no more than one adaptor or reducer should be used at any one time.

Ordering details:

Material: Brass BS 2874:1985 CZ121

Thread specification: Isometric (ISO)

PG

Imperial (ET)

National Pipe Thread (NPT)

British Standard Pipe (BSP)

Increased safety versions also available - suffix part numbers EExe

Brass Reducer

Brass Adaptor
